

Information needed to finish the website

Kevin - these are the open items. Most are one line each. Anything you leave blank stays as a placeholder on the site, so the more of this we get back, the more of the site goes live properly. Fill in what you know and skip what you don't; we can chase the rest.

1. Business identity

These block the most: your business name and domain are used in the page titles, the Google listing, and the structured data every search engine reads. Right now the site is publishing placeholders for them.

1. What is the exact legal business name?

As registered with the State of Tennessee - including LLC, Inc., or Co. if it has one. This has to match your license and bank records exactly.

2. Is it an LLC, a sole proprietorship, or something else?

Decides the legal line in the website footer.

3. What web address (domain) do you want?

For example drainprosn.com. If you already bought one, which one? If not, tell us your first and second choice and we will check what is free. Nothing on the site can be finalized until this is settled.

4. What email address should customers use?

Ideally something at your own domain once we have it, such as office@yourdomain.com, rather than a personal Gmail.

5. How many years have you been in the plumbing trade?

Google rewards demonstrated experience. Right now the site can only say you are licensed, not how long you have been doing this.

6. What year did Drain Pros TN start?

Used on the about page and in the business listing data.

2. Insurance, warranty, and coverage

The site will not print a claim it cannot back up, so all of this is currently left off entirely. Every competitor claims to be insured and none of them prove it, so real numbers here are worth having.

7. Who is your general liability insurance carrier, and what is the coverage amount?

For example: State Farm, \$1,000,000 general liability. Needed before the site can say you are insured anywhere.

8. Do you offer a warranty or guarantee on your work? What exactly does it cover, and for how long?

It has to be a specific, written term - for example 'workmanship guaranteed for 12 months from the date of service.' We legally cannot publish an open-ended 'lifetime guarantee' without written terms behind it.

9. How far will you actually drive for a job?

In miles or minutes from Charleston. Right now we are guessing at the edges - is Dayton in range? Decatur? Ducktown?

3. Reviews

This is the one part of the project that cannot be sped up by building faster. Competitors in Chattanooga have thousands of reviews. Getting to the top of this market realistically takes 250 to 350 genuine reviews over about two years, which means starting now, not after launch.

10. How many reviews do you have on Facebook right now, and what is the average rating?

This is our starting point, and some may be movable to Google.

11. Do you have a Google Business Profile yet? If so, is it verified?

Important: it must be set up as a service-area business with the home address HIDDEN. Publishing a home address risks the listing being suspended. Do not create one before we talk it through.

12. Roughly how many jobs do you complete in a typical week?

Tells us how fast reviews can realistically be gathered, so we can set a target you can actually hit.

4. Permit offices - 13 phone calls

The website now advertises your full service list in every town, and the office handles permitting per job. These calls are no longer holding up the website. They matter for scheduling: knowing which office to file with and how long each takes is the difference between promising a customer a real date and guessing.

For each one, the question is the same: **Will you accept a permit application from a Tennessee Limited Licensed Plumber, license #5045? And how long does a plumbing permit normally take to turn around?**

Priority	Office to call	Accepts LLP?	Turnaround
1	City of Cleveland - Building & Codes	Y / N	
2	City of Athens - Codes Enforcement	Y / N	
3	Bradley County - Building & Codes	Y / N	
4	McMinn County - Building Inspector	Y / N	
5	Hamilton County - Building Inspection	Y / N	
6	City of Collegedale - Building & Codes	Y / N	
7	Polk County	Y / N	
8	Meigs County	Y / N	
9	City of Soddy-Daisy	Y / N	
10	City of Red Bank	Y / N	
11	City of East Ridge	Y / N	
12	Town of Signal Mountain	Y / N	
13	Rhea County (only if Dayton is in range)	Y / N	

5. Online booking

Your Housecall Pro booking link is now on every page of the site. It asks the customer for a zip code first and turns them away if the zip is not on your list, so the list needs to match the towns the site advertises.

13. In Housecall Pro, does your service-area zip code list cover all 21 towns the site lists?

If a zip is missing, the website sends that customer to a booking page that rejects them - the worst possible outcome. Worth checking directly in your Housecall Pro settings.

14. Which services are switched on for online booking in Housecall Pro?

The website advertises 18 services. If only a few are bookable online, we should either match them up or point the button at a general request instead.

Anything else we should know?
